For over 60 years, Elite has been the recognized leader in EMC/EMI, Environmental Stress, Photometric, and Test Automation. Our services cover a wide range of applications and industries including automotive, aerospace, military, heavy machinery, commercial-industrial electronics, and wireless devices. Contact Elite today and see why manufacturers large and small from all industries rely on our engineers to get the job done right — the first time, and every time.
Complete Test Fixture & Automation Systems
In One Location

Full-Service Tool Room For Your Needs
• Fully integrated with testing services to reduce schedule and cost risk
• Experienced mechanical designers, machinists and programmers
• Custom fixtures for any product
• CNC mills up to 60” x 120” plates
• Manual Mill, Lathe, Welding, Pneumatic Tapping
• SolidWorks Pro, Simulation, Electrical Design, POWERSTATION CAD/CAM
• Dynamic vibration analysis tools to verify fixture performance

Custom Test Automation Solutions
• Design, build, program and support
• High-quality systems delivered to customer specifications
• Simulate real-world operation to confidently evaluate product life
• Validate reliability early in design
• Enhance production quality control with repeatable, automated checks
• Rugged motion control with PLCs

3D Printing with High-Strength Materials
• Rapid prototype from solid model
• Lower cost and faster delivery
• Tight tolerances, no special tooling
• Survivable in extreme environments
• Efficiently interface automation systems with complex products

How can we help you succeed?
